

# CREATE YOUR OWN TRILLIUM

## STEP 1:

Spend some time observing or drawing trillium flowers. You can go on a nature walk outdoors in a nearby forest, or even just search for pictures on your computer.

Notice the size and shape of the flower petals, the leaves, and the stem. The drawing below can also help guide you during this activity.

## STEP 2:

You want to begin by drawing 3 flower petals on a piece of white paper. Draw as many details as you'd like on the petals. Then, cut them out using scissors.

## WHAT YOU NEED

a stick,  
straw, or  
dowel

CONSTRUCTION  
PAPER

GLUE

TAPE

SCISSORS

## STEP 3:

Next, draw 3 leaf shapes on a piece of green construction paper. Then, use scissors to cut them out, too.

## STEP 4:

Use tape to attach the flower petals to your stick or straw. Then, tape the leaves under the flower petals. Make sure these are all placed like they are on a trillium.

## STEP 5:

To finish your flower, glue a small piece of yellow paper (or even yarn) to the center to add the stamens. And you're done!
