

ISSUE 2

# CREATE — YOUR OWN — WORLD

LET'S CREATE TOGETHER  
and invent a whole new world  
using our imagination.

WHAT'S INSIDE?  
- Reusing Materials  
- Building with Cardboard  
- Make a Paper Bag Tree

What do you want to create in your world?

Get started with some ideas on the next page & use the UNLEASH YOUR IMAGINATION activity in ISSUE 1.

# LET'S BUILD THINGS

What are some materials you could use to begin building things for your world?

Where will your new things go, live, or grow in your world?

# ▶▶ GET STARTED ▶

I want to build...

Write some ideas on this page about what you want to build in your invented world.

I want to build...

I want to build...

I want to build...

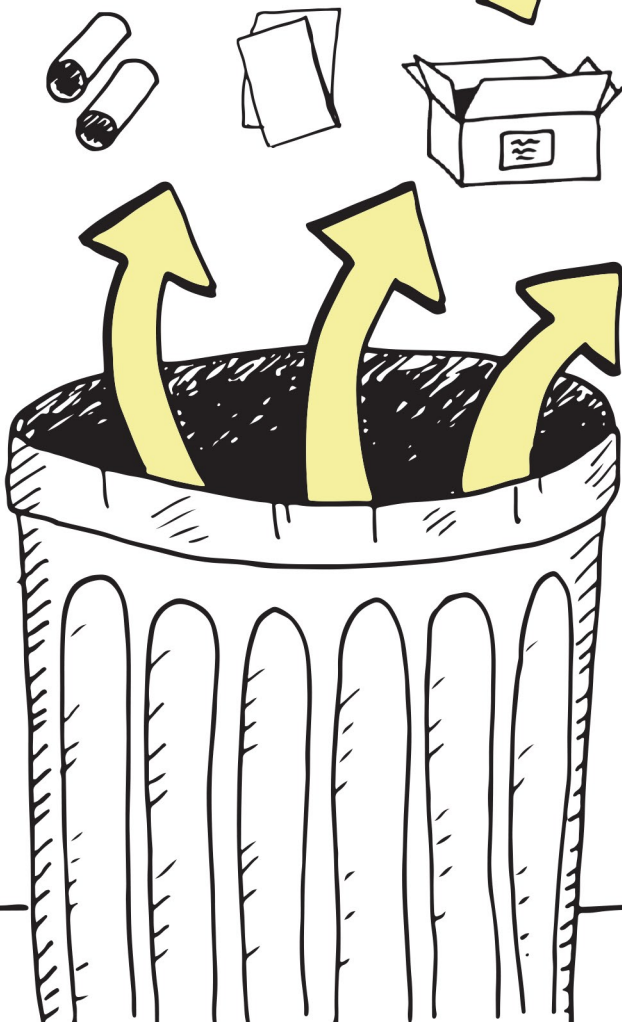

Try to get started building your ideas!

# ▶ GO BUILD ▶▶▶

# DON'T TRASH IT... TRANSFORM IT!!

Paper tubes, all kinds of boxes, magazines, and paper bags make great building materials.

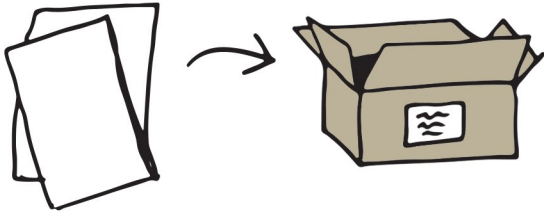

## RE-USING RULES!!

When we use materials again, we help reduce trash & take fewer resources from the Earth.

Let's come up with new ways to use everyday materials.

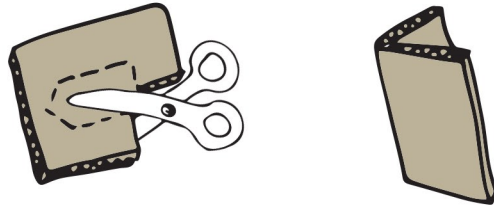

# 1 COVERING

Use paper or cut out pictures from magazines to cover the outside of cardboard boxes. Just glue them on!

# 2 CUT AND FOLD

Cut shapes out of flat pieces of cardboard, or fold and bend cardboard into the shapes you need to build with.

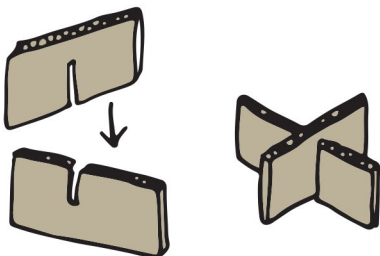

# AMAZING things YOU CAN DO WITH CARDBOARD

# 3

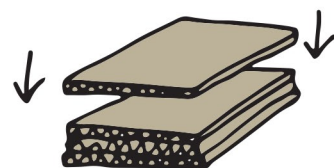

## INTERLOCKING

To make two flat pieces of cardboard stand up, you can cut slots in the top of one piece and the bottom of another (as shown here). Then slide them together!

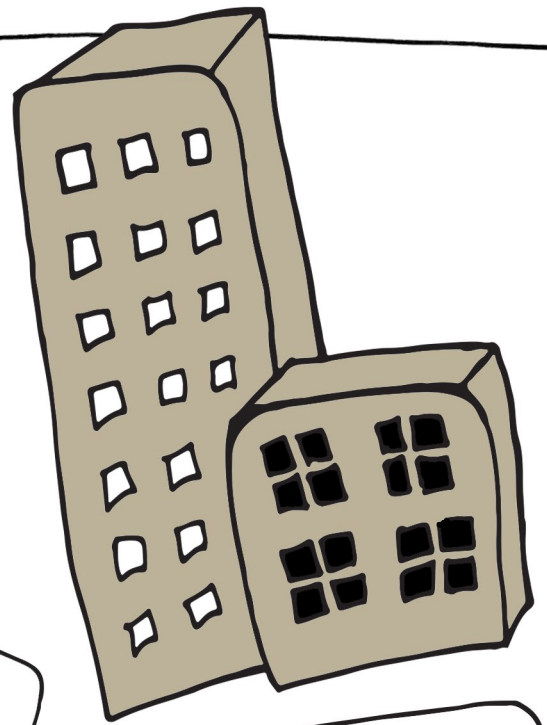

# 4 LAYERING

Glue several flat pieces of cardboard on top of each other to make a much stronger piece. This can be helpful if you're building something large or tall.

# LET'S MAKE CARDBOARD BUILDINGS

What kind of building do you want to make?

-----  
-----  
-----

How big or small will it be?

-----  
-----

What kinds of boxes could you use?

TIP: Cereal boxes work great!

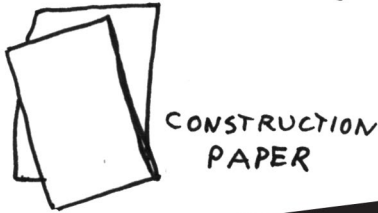

-----  
-----

**SKETCH** your idea here!  
Then grab some boxes & get started!

# MAKE IT

## WHAT YOU NEED

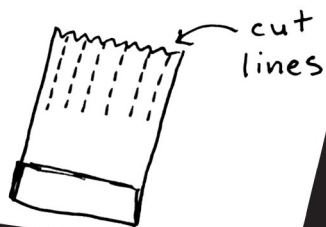

## PAPER TREE

## STEP ONE

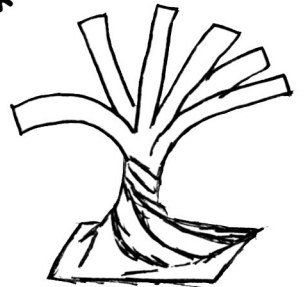

Begin with your paper bag flat & use scissors to make several long cuts from the top (open end) of the bag.

## STEP TWO

After you are finished with your cuts, open up the bag.

Hold the bottom of the bag as you twist the middle of the bag to form the trunk of your tree.

## STEP THREE

Now twist each individual cut strip to create branches for your tree. Feel free to use tape to hold things in place.

## STEP FOUR

Cut or tear leaf shapes out of construction paper & add them to your branches.
